(54) Title: SEPARABLE POWER DELIVERY CONNECTOR

(57) Abstract: A connector for providing power from a first circuit board to a second circuit board. The apparatus comprises a first conductive member, including a first conductive member first end and a first conductive member second end distal from the first end; a second conductive member disposed within the first conductive member, the second conductive member including a second conductor member first end and a second conductor member second end distal from the second conductor for electrical coupling with the first circuit board (315) and second circuit board (311), and one or more disconnectable conduction features (310, 322) for electrically coupling the connector with the second circuit board.
